# LIVE BLOOD ANALYSIS

**SEE** - This life gifting element of your body more fully reveal your path to vibrant overall health!

The **LBA** is an in depth 2 ½ hour session. The first hour we will educate you on live blood analysis. The second hour we will analyze your blood type, analyze a dry sample and a live sample, all conditions detected are discussed. The last hour we will go over diet recommendations based on your results.

## DURING YOUR L.B.A. ASSESSMENT:

- You gain an increased and intimate understanding of your body chemistry.
- You'll find understanding of how changes in diet and the use of targeted supplementation can be useful tools to regaining and maintaining your optimal health.
- You identify many negative influences and the positive choices that you can replace them with.

## WHAT DOES LIVE BLOOD ANALYSIS REVEAL?

- Free radical damage - unstable molecules created by pollution, tobacco smoke, dietary and other toxins
- Blood Cell 'stickiness' where RBC's stick to one another as a result of poor protein digestion
- Cell size and shape abnormalities from immune system deficiencies
- Poor circulation, oxygenation level and abnormal blood clotting
- Uric acid crystal and risk of gout, joint pain and achiness
- Candida/yeast/fungi overgrowths
- Leaky Gut Syndrome
- Parasite infestation
- Allergy Responses
- Liver Congestion
- Iron deficiency
- Bowel toxicity
- Dehydration
- Bacteria

## HOW DO YOU PREPARE FOR A L.B.A.?

Fasting with only WATER (or herbal non-caffeine teas) 8 hours prior yields the best blood pictures with the most information available. You may eat after your blood drops are taken. We strongly recommend you bring a spouse or family member with you for support.
